Checklist

Everything on the table before the first boot. Nothing is ordered mid-build.

ON THE TABLE

The dice table

- **Five casino dice** with readable faces
- **Pencil** and the recording grid
- A **private room** — no camera

THE COMPUTER

One machine, two boots

- **Boot 1:** stays online, watch-only, never holds a seed
- **Boot 2:** Tails USB, networking off
- **Data USB:** carries only checked files

FILES

Checked before anything goes offline

- **Tails 7.13** · **Sparrow 2.5.5** (exact) · **Electrum 4.8.2**
- **Ian Coleman** page (offline only) · **dice converter** (in this kit)

METAL

Three plates, three places

- **Three titanium plates** — one seed on each
- **StampSeed** kit holds 1 (buy 2 more) · **Cryptotag** holds 2 (buy 1 more) — don’t mix methods
- Three places, **far enough apart** that one disaster can’t take all three

> **Nothing is bought mid-build.** If a plate or USB is missing when its sheet arrives, stop and get it first.
